The important inquiry with re-

gard to Japan in a large way-is it not? as to the direction in which the nation is now moving. And in answer to this inquiry I am able to give a most unequivocal and quite satisfactory answer. Never before in the history of the country, and at the present time in the history of no other country, do we find the same intelligent, deliberate and widely prevalent purpose to do away with the nation's reproach and to rise in the scale of national business morality. In saying this I speak what I know to be true .-- Charles Vernou.

Montenegro's New Capital.

Montenegro is building a new cap ital at Antivari, the port of its present capital. The works, which are in the bands of Italian contractors, were inaugurated this month by the ruling prince, who insisted in his speech on the close ties of interest binding Montenegro to Italy on the one hand and to Russia on the other, while he left Austria out in the cold. It is supposed that the new town is to be the terminal of Russia's Balkan line, and the speech is regarded as having considerable diplomatic importance for that reason.

Nuts for Squirrels. The New York Park Department sked that visitors feed to the squirreis only hard-shelled nuts as the

eating of soft-shelled ones permits the teeth of the pets to grow long and turn under, so that they are unable thereafter to crack the hard nuts they bury in the ground for the winter's store. These hard nuts consequently, rot and the squirrels die of starvation. Here is an excellent object lesson for the human race in the care of teeth.

Coal of New Zealand. It is estimated that New Zealand has an available coal supply of 1 .-200,000,000 tons, of which no more tuan 20,000,000 tons have been touched.
